January 2026 sponsor update on Mike Honey's GitHub projects

Hi Sponsors!

Here's the January newsletter summarising what I have been up to across my GitHub projects, for my GitHub Sponsors. Your support (no matter how big or small) has helped fund and encourage me in this work.

If you see anything below that piques your interest, please don't hesitate to ask more questions or dig into the interactive dataviz projects yourself.

Please share my work across your networks and encourage others to join you in sponsoring my projects.

- Weekly updates of the data from GISAID and Nextclade continued.

- Weekly updates of the data from GISAID and Nextclade continued.

[covid-19-au-vaccinations](#)

- Daily scheduled updates of the data from covidlive.com.au and the associated project scraping the NNDSS data continued
- Weekly updates of the data from ADHAC (Aged Care Metrics) unfortunately stopped, as the Federal Health department stopped producing the report series I was using as a data source. My most popular product from that data was a Risk Estimate for COVID infections for Australia. Hopefully better quality wastewater concentration data will come from the Australian CDC to replace that.
- Monthly updates of the data from ABS (Mortality) continued

- Daily scheduled updates of the data from OWID, the WHO and HMD continued

I shared content and analysis from the above projects across various social media channels:

- TikTok: https://www.tiktok.com/@mike_honey_

I've mostly withdrawn from X/Twitter now, just posting my weekly global variant summary.

That's it for last month. I made a slow start to the year, after a rather hectic December. Thanks again for your support!

Sincere thanks

Mike Honey
